

Post Quality Self-Audit Checklist

Companion tool for "Maine 100+ Blog Posts AI Se Likhe — Kya Sach Mein Kaam Karta Hai"

Har post publish karne se pehle, in 4 sawaalon se khud ko check karein. Agar 2 ya zyada jawaab "No" aate hain, to post ko publish karne se pehle edit karna behtar hai.

- **1. Kya isme mera koi real example ya number hai jo sirf maine add kiya?**
Jaise: apna khud ka experience, apni khud ki calculation, apna khud ka data — kisi aur article se copy nahi.
- **2. Kya yeh post kisi doosri site ke same-topic post se distinguishable hai?**
Agar koi is topic par 5 alag-alag blog padhe, to kya aapki post alag khadi dikhegi?
- **3. Kya saari information verified/current hai (na ki AI ki training-data se purani)?**
Khaaskar rules, prices, policies, aur statistics — yeh hamesha double-check karein.
- **4. Agar koi affiliate link hai, kya woh genuinely relevant aur recommended hai?**
Sirf commission ke liye nahi — agar aap khud woh product use na karein, to link na daalein.

Agar 2 ya zyada "No" hain, to yeh post likely weak perform karega aur publish karne se pehle edit karne layak hai. Agar saare 4 "Yes" hain — publish kar sakte hain.

Bonus: Asli Formula (post ke ant se)

AI Speed + Real Experience + Honest Voice + Compliance Accuracy = Posts jo genuinely kaam karte hain.

Koi bhi ek factor missing ho, to result weak ho jaata hai — chahe baaki teen kitne bhi strong hon.

Yeh checklist Lokesh Goyal dwara banaya gaya hai — 4 websites par 100+ AI-assisted posts likhne ke practical experience se.
